

Gamma Announces New Distributor of Payroll Pro HRM in Suriname

Payroll Pro HRM is a fully integrated payroll and HRM software solution created specifically for clients based in the Dutch Caribbean by local software developer Gamma IT Solutions. Several distributors have been successfully selling, implementing, and supporting the software package throughout the region for over a decade. On July 1, Gamma added another distributor to its list, 101-Consultancy, which will service clients in Suriname.

101-Consultancy was founded in 2005 and is totally focused on supplying ICT services with the “one-on-one” culture. In order to adapt to the needs of its

customers, it uses direct communication methods and a complete help-desk support system adhering to international standards. 101-Consultancy is authorized to sell, implement, and support a variety of software packages in Suriname, now including Payroll Pro HRM.

Gamma is proud to be partnering with 101-Consultancy in order to bring the extraordinary benefits of Payroll Pro HRM to more commercial and governmental organizations in Suriname. “It’s always exciting for us to expand our reach within a region, and we’re confident that 101-Consultancy has the motivation and expertise to establish a wide range of new clients in Suriname,” explains Frank Baks, Gamma’s director of business development.

While Gamma and 101-Consultancy will work together to expand Payroll Pro’s presence in the Surinamese market, they are also looking together to open a new market in Guyana.

Clearly, Payroll Pro HRM is growing within the Caribbean region, and its integrated HRM system is going viral. Baks adds, “The unique HRM solution that we completely and seamlessly integrated with Payroll Pro HRM is

increasingly appealing to clients all across the region. No matter the size of a company or which
