

## Gamma IT Solutions Celebrates Grand Opening of New Location

Local software developer Gamma IT Solutions—the mastermind behind Payroll Pro, RADEX, RX Pro, and the Online ED/Immigration Card—held the grand opening of its brand-new office building last week Friday at Beatrixstraat 41 in Oranjestad, one door down from its previous location.

Gamma has been growing steadily for the past few years, taking on ever more projects in both the public and private sectors. The increasing number of projects has necessitated more employees, warranting greater office capacity. The new building provides modern, spacious, and comfortable offices for all of Gamma’s employees, as well as a welcoming conference room for its clients.

The grand opening was a splendid affair, with cocktails and hors d’oeuvres served throughout the evening. Frank Baks, director of business development at Gamma, shares, “Our team is very happy to finally be in the new building, and we wanted to share our excitement with our clients and other members of the community.” Gamma would like to thank everyone who attended for

joining the celebration and for supporting us.” Baks adds, “The best part about our new location is that we now have room for further growth of the company. We certainly expect some exciting developments on the horizon.”
